**123 Queens Street West**  
**Mezzanine Level - Willow Centre & Willow East, Toronto**

## **Martin Bass Lecture – Keynote Address (Room: Willow Centre & East)** **Using Primary Health Care EMR data for Quality Improvement: Stakeholder** **Voices**

---

### **Tracey Carr Bio**

Tracey is mom to two wonderful and healthy daughters who lead active lives, with unexpected things arising in those active lives being the most likely reason to access the healthcare system. Her family has a family doctor who uses an EMR and she has access to a personal health record which she uses to manage many aspects of health care for herself and her family.

In her professional life Tracey is a Registered Nurse with a Bachelor of Science in Nursing and a Master of Business Administration in Health Services Management, and is currently the Executive Director of McMaster's Department of Family Medicine. In this role, she has been involved in the design and development of [OSCAR EMR](#) and its use by McMaster's Family Medicine Teaching Units. More recently she has overseen the creation of [kindredPHR](#) that has a social mission to enable each person to have their own customizable space within an expanding digital health ecosystem in which they can connect the people and information that matter most to their health from their perspective.

Tracey believes passionately in the transformative potential of people working together for a common purpose. Her experience on both the professional and personal side of creating and using an EMR and personal health record give her a unique perspective on using this technology to improve quality of care.
